assistant: Hello, is this ?
user: this call will be recorded yeah hello
assistant: Oh, hey there! I'm {closer}… uh, is this a good time?
user: yeah sure
assistant: Awesome! So, I actually help small businesses get more customers online with simple websites… Do you currently have a website or anything like that?
user: yeah i have one
assistant: Nice! Is it actually bringing in customers or just there?
user: no it it has customers but not that much
assistant: Got it… so it's kinda working but not really pulling in a lot, huh? Hmm, have you thought about what might help boost that?
user: no can you suggest
assistant: Yeah, for sure! Um, sometimes it's just about making the site more user-friendly or maybe adding some fresh content. But, uh, what were you thinking budget-wise for something like that?
user: no i haven't really thought about it like what are your packages
assistant: Ah, okay… yeah, fair enough. So, we could honestly start small, like a basic version first and see if it works. Would you be open to trying something like that?
user: yeah sure like what are your pricing
assistant: Hmm, so for a basic website, it usually starts around a few hundred dollars, depending on what you need. What were you thinking roughly?
user: around

assistant: Oh, okay, got it. So, like, are you looking for something more budget-friendly or just not ready to commit yet?
user: like i i am from india so in rupees maybe three thousand rupees
assistant: Ah, I see! Yeah, that's a bit on the lower side for a website. But, um, we could definitely explore some options that fit your budget. Maybe a really simple landing page or something? Would that interest you?
user: yeah sure can you call me like after like tomorrow at five thirty
assistant: Sure thing! I can give you a call tomorrow at five thirty. Just to confirm, is that the same number I'm calling you on?
user: yeah yes yes yes you are right
assistant: Great! I'll touch base with you then. Looking forward to chatting more about it! Have a good one!
assistant: Thank You.
